

APPENDIX 2:

STUDENT SELF-EVALUATIONS FORM

(used by students)

Student's full name: Lê Hải Trung

Student ID: V202301000

Email: 23trung.lh@vinuni.edu.vn

Major: ME

Phone: 0332915559

Industry supervisor's full name: Tran Trung Duc

Title: Head of UAV Department

Department: UAV Department, Phenikaa-X

Company: Phenikaa-X

Email: ductt@phenikaax.com

Phone: +84387217633

Please assess your performance during the internship based on the following evaluation criteria on a scale of 1 to 5 and make specific comments in each category.

1-Unsatisfactory performance

4- Good performance

2-Below expectation

5- Excellent performance

3-Average performance

Criteria	1	2	3	4	5	Comments
1. I have maintained professionalism during the internship (professional presence, punctuality, dressing, greeting, etc.)			X			I did maintain professionalism to some degree but still friendly enough to connect and network.
2. I have understood core concepts of the program					X	I joined the program with an attitude of learning as much as I can
3. I have been able to complete given tasks with timeliness, accuracy, quality and efficiency.				X		I tried my best to complete most task, but some did not on time and with expected quality due to lack of experience and knowledge
4. I have functioned effectively as a team member.					X	I worked with multiple departments

Criteria	1	2	3	4	5	Comments
						and presented myself as a team player
5. I have recognized my ethical and professional responsibilities.					X	Everything respond to standard and ethic
6. I have demonstrated analytical thinking, critical thinking, and problem-solving skills while completing given tasks				X		I did solving task logically and strategically, like an engineer
7. I have proposed new ideas, creative initiatives and/or applied innovative methods/ways to complete given tasks				X		I try my best to propose original ideas and solutions, even though some did not work.
8. I have demonstrated effective communication and collaboration with colleagues and customers (listen sincerely, be willing to help, be trusted, etc.)				X		I learned a lot from my supervisors, mentor and colleagues through conversation and I also ask them to share their problem so I could help them to some degree.

Compared to other interns in the host company, how would you rate your performance?

€ Far inferior

€ Inferior

€ Similar

€ **Superior**

€ Far superior

What are your main strengths? Include some discussion of the 8 points above.

Due to the familiarity with the field, I believed that I did a good job in the integration process from completing some beginning tasks such as 3D design, UAV model inspection and setting up new UAVs, and additive manufacturing using 3D printers. I have already done this before so I can complete them with ease.

My main strengths during the internship include flexibility, fast integration, eagerness to learn, and the ability to observe and learn from experienced colleagues. These qualities have allowed me to maintain professionalism consistently, including punctuality, appropriate dressing, and respectful interactions.

I have developed a solid understanding of the core concepts of the program, enabling me to complete tasks with timeliness, accuracy, and quality. My ability to adapt quickly and absorb knowledge from others has helped me function effectively within a team, contributing to collaborative problem-solving and innovative solutions.

By observing experienced team members and applying their approaches, I have recognized and upheld my ethical and professional responsibilities, ensuring that my work aligns with standards and best practices. I have consistently demonstrated analytical thinking, critical thinking, and problem-solving skills, often proposing creative ideas or innovative methods to improve task efficiency.

Finally, my willingness to listen sincerely and assist colleagues has strengthened my communication and collaboration skills, helping me build trust and work productively with both team members and clients. Overall, my combination of adaptability, learning ability, and professionalism has been central to my performance and growth during the internship.

What are your main areas of improvement? Include some discussion of the 8 points above.

My main areas of improvement include deepening my foundational knowledge in robotics and programming, as I sometimes find gaps in understanding the background concepts necessary for complex tasks. This occasionally affects the accuracy and efficiency of my work, as I may rush through tasks in an effort to complete them quickly, which can compromise quality.

I also recognize a tendency to be impatient, especially when facing challenges or waiting for results, which can impact my professional presence and teamwork if not managed carefully. Improving in these areas would help me function more effectively as a team member, communicate more thoughtfully, and uphold higher standards of ethical and professional responsibility. Additionally, by taking the time to analyze tasks more critically and plan before acting, I can enhance my problem-solving skills and produce work that demonstrates greater accuracy, quality, and innovation, while still maintaining my eagerness to learn and adaptability.

I hereby declare that the information provided is true and correct. I also understand that any willful dishonesty may render for course failure.

Hanoi, 09/ 11/ 2025
